

PNP IBTS — User Tutorial

Integrated Benefits Tracking System

Welcome! This guide walks you through the Integrated Benefits Tracking System (IBTS) and shows you how to use each part of it. You don't need to install anything — just open the link in your web browser and follow along.

Note: This is a demonstration system. The accounts and data below are sample data for you to explore freely — go ahead and click around, add records, and try things out. Nothing here is real personnel information.

Getting in

1. Open the site: **<https://pnp-ibts.vercel.app>**
2. You'll see a **sign-in page**. Log in using one of the sample accounts below. Each account represents a different type of user, and each sees the system differently.
3. To switch to a different account later, click **Sign out** (top-right), then log back in with another account.

Sample accounts

Role	Email	Password
Admin	j.reyes@ibts.local	admin123
HR Manager	a.cruz@ibts.local	hr123
Officer	s.bautista@ibts.local	officer123
Retiree	r.domingo@ibts.local	retiree123
Dependent	m.cruz@ibts.local	dependent123

We suggest starting with the **Admin** account, since it can see everything, then trying the others to see how the experience changes per role.

1. Signing in as the Admin

Log in with **j.reyes@ibts.local / admin123**. The Admin has full access to every part of the system. The **left sidebar** shows all modules: Dashboard, Personnel, Claims, Retirees, Financial, Audit Log, and Settings. At the top you'll find a search box, a light/dark theme toggle, a notification bell, your name, and Sign out.

Dashboard

Your home screen: a profile summary, a service-years chart, a promotion timeline, a benefits summary, and an **Action Required** feed.

Try it: Click the notification bell (top-right) to see alerts. You can mark them read or dismiss them.

Personnel

The directory of all personnel records, in a sortable, searchable table.

Try it — add an account: Click **Add Account**, choose a role (Officer, Retiree, or Dependent), fill in the details, and save. Your new record appears right away. If you add a Retiree, check the **Retirees** module — they'll be listed there too.

Try it — edit a record: Click **Edit** on any row to update rank, service years, or status, then save.

Claims

As Admin you see *all* claims and can review and decide on them.

Try it — review a claim: Find a claim marked **submitted**, click **Review**, then **Start Review** (status becomes *under review*), then **Proceed to Decision** and choose Approve or Reject. Each decision is recorded in the Audit Log.

Financial

An overview of benefit commitments and claim activity, shown as summary cards and charts.

Try it: Click **Export CSV** to download a report of the figures.

Audit Log

A read-only, timestamped record of important actions. After doing the steps above, check here to see your actions listed.

Settings

Update your profile (name, email, division), change your password, and view your account details.

2. Signing in as the HR Manager

Sign out, then log in with **a.cruz@ibts.local / hr123**. The HR Manager is similar to the Admin — they can manage personnel and review/decide claims.

Notice the difference: In the **Financial** and **Audit Log** modules, the HR Manager has a read-only view — for example, there's no Export button on the Financial page. This reflects each role's level of access.

3. Signing in as an Officer

Sign out, then log in with **s.bautista@ibts.local / officer123**. Officers have a focused view — notice the sidebar shows fewer modules. The Claims page is titled **My Claims** and only shows their own claims.

Try it — request a claim: Click **New Claim Request**, choose one of your benefits, add a note, and submit. You'll get a confirmation and a notification. Now sign out and log back in as the **Admin** or **HR Manager** — your request appears in their claims list, ready to review. This is how a request flows from an officer to an approver.

4. Signing in as a Retiree

Sign out, then log in with **r.domingo@ibts.local / retiree123**. A retiree's dashboard focuses on retirement and pension benefits. Retirees can view the Retirees directory and submit claims for their own benefits, just like an officer.

5. Signing in as a Dependent

Sign out, then log in with **m.cruz@ibts.local / dependent123**. A dependent is a family member (for example, a spouse) who is a beneficiary. Their view is the simplest and focuses on **verification**: their verification status, the documents needed, their sponsor, and any insurance benefits they're a beneficiary of.

Try it: If the status isn't verified, click **Request Re-verification** to resubmit documents. This notifies the administrators.

Helpful things to know

- **Switching roles:** Always Sign out first, then log in with a different account to experience the system as that role.

- **Search:** The top search box finds people and claims you have access to — try typing a name.
- **Notifications:** The bell shows your alerts; the number badge is your unread count.
- **Theme:** Use the Light / Dark button at the top to switch appearance.
- **Your changes are saved:** Anything you add or change is stored, so it's still there when you return or when another user logs in.

That's it — feel free to explore. Since this is a demonstration system with sample data, you can't break anything, so try out every feature.
